Regional Medical Center could

Regional Medical Center could have been part of the cause.

After Fregirick Wright picked up his son from a day care center across the street from Everglades Regional Medical Center, the baby's lips turned purple and he began to bleed from his nose. Because Everglades in now closed, the ambulance service had to take baby Wright to Glades General Hospital 15 miles away. It took 29 minutes to get baby Wright to a hospital.

minutes to get baby Wright to a hospital. Health Care officials and au-thorities say that there is no way of telling whether the child's death could have been

child's death could have been prevented until an autopsy has been done. The autopsy report has not been released.

On Thursday, June 11, at 4:15 p.m., Tina Gaumer, the child's mother, left Fredrick, Jr. and his sister, Jasmine, at the Rock Family Daycare at 147 S. Barfield Highway Fredrick Wright, Jr. was pronunced dead at 6:50 p.m. at Glades General Hospital in

\$2,500 reward offered for information

Editor
An arsonist is being blamed for a blaze that has blackened South Bay City Hall and caused an estimated \$1 million in damage. State fire marshals have determined the fire was set in two different locations in city hell swand 1 am on Mon. city hall around 1 a.m. on Monday, June 15.

City Manager Michael Jack-son says some of the city's pa-perwork was lost in the fire, but most of the city's vital pa-

perwork is kept in fireproof cabinets on the second floor and is intact. His staff has moved to temporary offices at the former post office at 110 N.W. First Street.

N.W. First Street.

The building, which was built in 1977, includes the police station, firehouse as well as the city hall. Mr. Jackson said the fire department and police station are still usable and staff will continue to stay there.

Police Chief Processing

Police Chief Danny Jones

said one of his officers was in the police station writing a re-port at the time of the fire, She smelled smoke and alerted the fire department.

fire department.

A \$2,500 reward is being offered for any information on the blaze. Anyone who knows who might have deliberately set the fire is asked to call Chief Jones at 996-6511

South Bay Commissioners will hold their next meeting on June 30 at Tanner Park in the recreation center.

(SUNPHOTO by Jennie S:
Pahokee High School Salutatorian LaTisha Jones began her address by sayin
her fellow graduates that "The secret to success is not being afraid of travelin
unchartered waters," and she ended her address by saying "Begin with an en
mind."

Mino. Valedictorian George Perez began by saying "The class of 1998 is graduating to-day!" George advised his classmates to "Always remember your past, without doing so you will not be able to penetrate what lies ahead." And again he closes by saying "The class of 1998 graduates today!"

Save Our Rivers

By TWILA VALENTINE

The mission of the Land Stewardship Program of the South Florida Water Manageimplement measures neces-sary for the proper manage-ment of land and associated ment of land and associated water areas owned or controlled by the district. These lands generally include those acquired by the—Save Our Rivers program and other large holdings not utilized for operational or administrative purposes.

tional or administrative purposes.

As steward of district lands, the Program is responsible for their protection, enhancement, restoration, and preservation, for the beneficial use and enjoyment of existing and future generations. A prime requisite in managing these public lands is to ensure that the water, fish and wildlife populations, native plant communities, and related resource are maintained in an environmentally acceptable manner and make available for appropriate outdoor recreation-

al activities consistent with protection of the water re-

Sources.

In this fifth part of a series, we continue to look at some of the specifics for which the district is responsible under the land stewardship program and the acquisitions under the SOR program.

Fifth in a series

A major stewardship task is to return SOR lands as close to their original natural state, hydrologically, as possible. This improves groundwater storage in wetlands, water quality by slowing runoff, and habitat for fish and wildlife: The primary focus is on the nationally significant program to restore the Kissimmee River, Lake Okechobee and Everglades ecosystem. Several SOR acquisition projects are contributing directly to the effort A major stewardship task is

Surgical Procedure Offers 99% Cure Rate For Melanoma

•••Cures•••

(NAPS)—Mohs micrographic surgery, a specialized procedure for skin cancer, may be the best option for certain people with melanoma.

Malignant melanoma, the most dangerous form of skin cancer, is quickly increasing in incidence. According to The American Academy of Dermatology, Americans have ma in 87 chance of developing American Academy of Dermatology, Americans have one in 87 chance of developing melanoma in their lifetime, which is a 1,800 percent

which is a 1,800 percent increase since 1930.

Mohs micrographic surgery is a precise method of skin can-cer removal considered to be the "rescue therapy" after other treatments for skin cancer fail. However, experts say patients should ask their dermatologist or family physician to consider Mohs surgery first, instead of last in the treatment chain. In addition to helping stop the cycle of recurrent skin cancers, the procedure can offer a cure rate of up to 99 percent for cer-

rate of up to 99 percent for cer-tain types of tumors.

The surgery is a process involving the removal of dis-eased skin tissue and the immediate microscopic exami-nation of underlying tissue. A "mapping" technique lets the surgeon identify the exact loca-tion of manistry cannot tissue. tion of remaining cancer tissue Only the diseased tissue is

Only the diseased tissue is removed, preserving as much of the surrounding normal tissue as possible.

The reassuring for people with skin cancer to know that Mohs micrographic surgery can be their safety net, "says John Zitelli, M.D., president of the American College of Mohs Micrographic Surgery and Cutaneous Oncology."

"However, while not all first time skin cancers need Mohs micrographic surgery, saving the best treatment for last car be dangerous and expensive—a tumor that continues to grow after it has been treated leads to needless suffering and

unnecessary costs."
John Skouge, M.D., and vice president of the college, urges patients to discuss treatment options with their physicians.
"At the time of diagnosis, patients should ask their deractlogist or family physician.

patients should ask their der-matologist or family physician if Mohs micrographic surgery is appropriate for them."

The danger of melanoma lies in its ability to rapidly spread to other organs, most common-ly the lungs or the liver.

Removing skin cancer com-pletely is a challenging process, medical experts say, because a tumor that is visible to the naked eye is usually the "tip of the iceberg." Cells may form roots of diseased tissue that

UF Agricultural economist says delay in pesticide ban could boost support for expanding Latin American trade

By Chuck Woods
University of Florida
A University of Florida professor says agricultural industry support for expanding trade with Latin America could depend on delaying a 2001 ban on a controversial but widely used pesti-

"It would be a good trade-off," said John Van-Sickle, agricultural economist with the UF's Institute of Food and Agricultural Sciences. "Basically we're talking about delaying the ban "Basically we're talking about delaying the ban on, a pesticide our fruit and vegetable growers need in order to compete with Mexico and other countries. The delay could boost Florida agricul-tural industry support for expanding trade in the hemisphere." He said the trade-off could help advance Pres-ident Clinton's Free Trade Area of the Americas initiative (FTAA), which builds on the 1994 North American Free Trade Agreement (NAF-

North American Free Trade Agreement (NAF-TA). FTAA would include all countries in the Western Hemi Hemisphere, creating the largest free rea in the world. Only Cuba would be

excluded.

The proposal would delay the phase-out of methyl bromide, a broad-spectrum soil fumigant blamed for depleting the earth's protective come layer and used by farmers in Florida, California and other states to control pests and diseases. He said the current 2001 ban could be delayed until 2005 or later.

delayed until 2005 or later.

Professor VanSickle, who serves on the United Nations' Economic Options Committee that evaluates come-depleting substances, said no substitute pesticides currently are available. He said many Florida growers will be forced out of business without the chemical.

business without the chemical.
Environmentalists say the current 2001 ban should not be delayed. Corrina Giffillan, director of the Ozone Protection Campaign at Friends of the Earth, Washington, D.C., said the U.S. uses 40 percent of all methyl bromide in the world and developing countries use only

"We already have significant ozone depletion over the Northern and Southern hemispheres, and it makes no sense to delay the ban any longer," Ms. Giffillan said. "Ozone depletion increases the amount of harmful ultraviolet radiation that causes skin cancer, cătaracts and weakened immune systems."

Under the 1990 Clean Air Act and the ozone protection treaty known as the Montreal Prote-protection treaty known as the Montreal Prote-

protection treaty known as the Montreal Proto-col, the pesticide cannot be used after 2005 in ed countries and 2015 in developing

countries.

"The bottom line for U.S. growers is that we cannot use the chemical after January 2001 while-producers in Mexico and other developing countries can use it for another 14 years, "Professor VanSickle said. "That's unfair."

He said the difference will hurt U.S. vegetable producers who still are reeling from NAFTA, especially from Mexican competition.

"It's like a double whammy. There's already a heavy being very from NAFTA and now we're

"It's like a double whammy. There's already a heavy hangover from NAFTA, and now we're about to lose a valuable production tool," he said. "A flood of Mexican imports has put more than 100 Florida growers out of business. In this situation, it's easy to see why the industry is reluctant to support any effort to expand free trade even further.

"If the President and Congress want to increase trade with Latin America, they need to reach out to Florida's agricultural community by delaying the 2001 ban on this pesticide." Professor VanSickle said. "The Clinton administration needs Florida's suproof to FTAA and this

tion needs Florida's support for FTAA and this could be the best way to get it."

In another bid to gain Florida support for

That another so to gain Florica support for FTAA, Clinton already has announced the FTAA secretariat will be located in Miami. Professor VanSickle said delaying the ban until 2005 would bring the U.S. in line with other developed countries under the Montreal. treaty. It also would lessen the impact on the state of the country of the c domestic growers and give UF scientist time to develop alternatives to methyl bro

Behind a successful person we often find the legacy of a loving father

We may not know their names. Some are shopkeepers or farmers or shoe salesmen. Noth-ing they did in their jobs made them famous or successful. But what they did as fathers

successful. But what they did as fathers, changed the course of history.

A writer once described the goal of fathering as this: to jumple a spark in the life of your children that lights up the rest of their lives. In honor of Father's Day, here, are four dads who did just that. Each gave their child a quality

did just that. Each gave their child a quality that lit up their lives.

Luther was a jaunty, confident man, small in stature but large in love. He lived in the South Fronx of New York, and worked firsts as a gardener on estates in Connecticut. Later, he went to work at Ginsburg's, a nanufacturer of women's suits and coats. He started out working in the stockroom and moved up to become a shipping clerk. He worked hard to raise his daughter, Marilyn, to protect her from the streets, and to make sure she "ran with the good girls." To his son he gave a legacy of good character and hard work. Luther's son, General Colin Powell, says this: "I wouldn't be where I am today without my father."

Alfred Roberts was a small-town shopkeeper, He managed the grocery store in a place called Grantham. For his daughter Margaret, he was a fount of wisdom and knowledge, even though he had little formal education. She remembers fondly a time when she wanted to go out and hang around with friends rather than do her school work. "He said," Never do things just because other people do them." It was a simple expression, but something she carries with her to this day. She also recalls his commitment to service that helped Margaret just her career. Today we know little Margaret Roberts as former British Prime Minister Margaret Thatcher. George was a lawyer who first lived with his family on a gently sloping plain next to the San Gabriel Mountains, in California. Handsome and slim, he wore a floppy mustache. He was elected district attorney of Los Angeles County, but you will remember him more because of his son. His children - George, for and Nita - adored him. He took them fishing and sailing, taught them how to ride a horse and shoot a rifle.

FAMOUS FATHERSPAGES

FAMOUS FATHERS/PAGE 5

Letters to the Editor

Support of Navy appreciated

Pear Editor: I wanted to personally thank you for your wanted to personally thank you for your support of the Navy's public service advertising program. The support you have given is not only helping the Navy, but also the country. Men and women all over the globe are serving their country and your support of our recruiting program helps us provide the strength of our fleet.

Today's Navy has nearly 450,000 men and women who serve with pride, distinction and honor. This year the Navy will need nearly 60,000 new sailors in order to continue our service to the nation and your continued support remains crucial. But there is a more personal

reason why I wanted to take time to thank you The awareness you generated may have made an important difference in the lives of the young sailors who help us achieve our mission. By helping us extend information about educational and career opportunities to individuals in your community, you can take great satisfaction in knowing that your contribution may have helped provide \$40,000 for college, guaranteed technical training or a chance to live and work

It is your support that helped make these things happen, and I earnestly thank you for your continued support of the Navy's public ser-vice advertising program.

Sincerely

Marie T. Lucas
Public Service Director

About letters

Following the business meeting an Italian fest was hosted by Greadle York and co-host-

ed by Judy McMillan, Sara Nell Phillips and Laurel Tarr. The Italian theme was carried throughout with decorations depicting sunny Italy with Italian music and a presentation of Italy with Italian music and a presentation of Italy. Each member received a hand made

The menu for the evening consisted of lasagna, chicken italiano, spaghetti, Italian salad, fresh garlic rolls, a delicious array of fresh fruit with strawberry truffle for desert.

Those in attendance were: Sandra Chamblee, Merlyn Cochran, Karen Corbin, Laura Mae Enfinger, Jane Evans, Janise Goforth, Judy McMillan, Linda McMillan, Pat McKee, Laverne Motes, Sara Nell Phillips, Gloria Swager, Laurell Tarr and Greadle York.

To Dad, with love

My brother and I were among the most fortunate sons to have a dad who hugged, listened, taught

rship

and forgave with an emotional intensity that still nourishes our lives today. He died in 1965 when I was 20. Thirty plus years later, a day doesn't go by when I don't think of him or feel his loving presgiris and confident, skillful boys. This should be no surprise to those of us who were supported and cared or and loved by our fathers.

ence.
I think I was especially lucky because I remember other friends not feeling quite the same way about their fathers. And I am hopeful for today's kids because there are signs that certain changes in the role of the father may contribute to healthier and happing repersions to come.

may contribute to neattner and happier generations to come. One recent poll shows that 90% of fathers say they share in child care, help feed the baby and take a turn at the changing table. Three times as many fathers are present in delivery rooms as there were the theory are not seen to the property were a now Second-time nor many fathers are and Second-time nor many fathers are now Second-time nor many fathers are now Second-time nor many fathers are now Second-time nor many fathers are not second to the normal fathers are normal fathers. in delivery rooms as there were-twenty years ago. Seventy-five per-cent of fathers say they spend more time with their children that their fathers spent with them. As one middle management worker put it: "My goal is when I'm in my senior years to look back and say to myself that I took every coportunity to spend time with my

opportunity to spend time with my children and with my wife." His perspective is vital for all fathers and their children. Several recent studies demonstrate that

ot us wno were supported and cared or and loved by our fathers. Gina Scarangella was only a teen when her dad, a New York City police officer, was killed some years back. For her, he was a hero not only far the way he died - shot by gunnen - but even more so for the way he lived! Here is her poem, "To You, Dad," that she wrote in the early days of the grief!
You've been my dad for 14 years. They were the best years of my life, just knowing you were there for me to give me good eduice. But in all my dreams and all my proyers and in all the things I do, Il never for get the times we had and the first time! said? I love you." Some pople soy! I resemble you and we're alike in many woys that's why! In moroud to be your daughter and shary your many woys. I hat to be eval temes your many woys. I hat to be eval temes us and I'll misers we want one we do? I'll misers were were the weard I'll misers were well there in the I'll misers were well the men of I'll misers were well the well and I'll misers were well the well and I'll misers were well the well and I'll misers were well and I'll misers we well and I'll misers we well and I'll misers we want on the well and I'll misers we well and I'll misers

proud to be your daughter and share your many ways. I hat to see you leave us, dad, I'll miss you wery much but when I pray and think of you I'll feel our futherly touch... Dads - no less than mons - owe it to their children to touch, to love, to be there for them. An they owe it to them selves as well. Today, would be the perfect day for par-ents and youngsters to eatch up on a tittle hugging and some deenly

a little hugging and some deeply felt "I love you's." At least I think so and my dad would have, too.

Military News

Lachreisha E. Anderson, daughter of Shirley A. Jones of Pahokee, recently completed U.S. Navy basic training at Recruit Training Command,

Recruit Training Command, Great Lakes, Ill.

During the eight-week pro-gram, Anderson completed a variety of training which includ-ed classroom study and practical instruction on naval customs, first aid, fire fighting, water safety and survival and ship-board and aircraft safety. An emphasis is also placed on physi-cal fitness.

Anderson and other recruits also received instruction on the

Anderson and other recruits also received instruction on the Navy's core values - honor, courage and commitment - and how to apply them in their fillitary performance and personal conduct. Applerson joins 55,000 men aind women who will enter the Navy this year from all over

the country.

Men and women train together from their first day in the Navy just as they do aboard ships and at shore commands around the world. To reinforce the team concept, Anderson and other recruits also were trained in preventing sexual harassment and ensuring equal opportunity. Even as the naval service gets smaller over the next few years, highly motivated young people like Anderson are still finding an opportunity to improve their knowledge and education as they become part of the most highly technical naval force in history. This year alone the Navy will have more than \$7,000 job openings and opportunities which include guaranteed training.

She is a 1997 graduate of Pahokee Middle/Senior High School.

Supplement Hailed By Some As Life Saver

(NAPS)—A vitamin-like sub-stance found in every cell in the body may hold the answer to preventing heart disease.

Naturally present in small amounts in a wide variety of foods, CoEnzyme Q10 plays an

toous, important part in the production of energy.

This year scientists from all over the world attended the first International CoQ10

Boston.

May 21 Conference in Boston.
Scientific sessions from May 21
to 24 discussed clinical studies
that have demonstrated the supplement's positive impact ease and aging, on heart disc

among other problems.

Studies have consistently shown that CoQ10 is deficient in most heart patients and taking it may dramatically relieve heart disease symptoms with-

heart disease symptoms with-out producing adverse effects. "The discovery of CoQ10 rep-resents one of the major medic-inal advances of the 20th century for the treatment of heart disease," said Stephen Sinatra, M.D., F.A.C.C., a clinical cardi-ologist at Manchester ologist at Manc Memorial Hospital Connecticut.

Besides being the subject of hundreds of scientific studies, the supplement has sparked national interest on television shows such as ABC's World

News Tonight.

During recent years there has been a growing interest in the healing power of antioxi-

type of antioxidant. It acts both directly and by regenerating the active form of vitamin E," said Professor Gian Paolo Littaru, chairman of the International Coenzyme Q10 Association "The implications of CoQ10 in cardiovascular disease are of paramount significance."

Some doctors prescribe the supplement along with more traditional medications in the treatment of cancer, AIDS and even gum disease. Studies sugeven gum disease. Studies sug-gest that taking it may also be a useful preventative measure in times of extreme stress. The supplement has also been prescribed to counteract the effects of traditional med-

ications, such as those that lower cholesterol. That's because cholesterol-lowering medications can diminish the body's natural supply of CoQ10.

Peter Langsjoen, M.D., a car-diologist in Texas, routinely prescribes CoQ10 to cardiac patients and has reported significant success. Healthy people can also benefit, says Langsjoen. He gave the supplement to 16 of his patients who were in their 80's. Before taking the supplement these patients suffered labored breathing during exertion and

Within days, the patients felt much better. Their fatigue dis-appeared and they felt more energized than they had in

Although CoQ10 is found in Although Cool is round in food sources such as mackerel and sardines; organ meats like heart, liver and kidney; soy oil and peanuts, it takes very large quantities of these generally fatty foods to get 30 mg. A com-

mon preventative dose ranges from 10 mg to 30 mg.

"The Japanese have perfected a method of getting tremendous amounts through yeast fermentation," said Langsjoen.
"As a nondring over-the-

"As a non-drug, over-the-unter product, CoQ10's "As a non-drug, over-the-counter product, CoQ10's unique benefits are readily accessible to allmost everyone," notes Don Blaine, general man-ager for Kyowa Hakko U.S.A., Inc., the leading supplier of this compound. "We are excited to be involved and strongly believe CoQ10 will continue its growth in becoming a main-growth in becoming a maingrowth in becoming a mainstream nutrient."

FLORIDA-GEORGIA HIGH SCHOOL FOOTBALL ALL-STAR GAME LIVE NEXT SATURDAY, JUNE 20

Brad Banks in All-Star classic lineup

The All-Star game will be televised June 20 and Glades Central High School gradu-ate/quarterback Brad Banks is on the 1998 Florida High

School All-Star roster.
The 14th Florida-Georgia
High School Football All-Star
Game - the "Scottish Rite
Football Classic" - airs live on Football Classie" - airs live on Sunshine Network next Saturday, June 20, at 6 p.m. The game is a component of Sunshine Network's year-round "Dodge/Florida High School Champions Series" ini-tiative

tiative.

Administered by Scottish Rite Festival, the game is the premier showcase of high school talent in the two states Scottish Rite Children's Hospital in Atlanta is the second were hospital. ond-year beneficiary of the all-star classic. SRF officials antic-ipate a Georgia Dome crowd of about 20,000.

Dave Neal calls the play-by-play action, with former

University of Florida and Atlanta Falcons running back Harmon Wages providing analysis. Dave Cohen and Jamie Newberg provide pre-game and halftime commen-tary and interviews. Of the 35 players on the Georgia all-star roster, 32 signed grants-in-aid with NCAA Division I-A schools, while one will attend a junior college; two remain undecided

college; two remain undecided on their college selections.

Among Florida's 35 all-stars, 27 inked with I-A uni-versities, six with I-AA schools and one is undecided (Brad Banks).

Spearheading the Florida prep challenge are CTSD "All-South" first-teamers and Sunshine Network Florida All-Gridiron Team members, offensive lineman Mike Pearson (Florida) of Seffner Armwood, offensive lineman Brett Williams (Florida State) of Kissimmee Osceola, and

running back Earnest Graham (Florida) of Cape Coral Mariner. Wide receiver Bosley Allen (North Carolina) of Bradenton Southeast was an "All-South" second-team member, while wide receiver John Capel (Miami) of Brooksfield Hernando, defensive lineman Ryan Pickett (Ohio State) of Zephyrhills, linebacked William Witherspoon (Georgia) of Springfield Rutherford and

defensive back Stanford Samuels (Florida State) of Miami Carol City were third-team honorees.

Leading the Georgia allstars are defensive backs Robert Cromartie (Florida signee) of Atlanta's Douglass High School and Tim Wansley (Georgia) of Buford -- both of whom were first-unit members

- BASEBALL -

For one year Glades Day School graduate Lane Crews is prop ty of the Kansas City Royals. Shown above, Lane Crews sha Scout Albert Gonzalez's hand after signing.

Lane Crews drafted by Kansas City

By Buffie Chapman Glades Day School graduate Lane Crews, son of Gary and R.J. Crews, has been drafted by the Kansas City Royals baseball team, making him their property

one year. Did he go? NO!

Crews has also earned a two-year scholarship to play baseball for Palm Beach Community College in Lake Worth, so instead of immediately entering Royal's training program he is using his baseball scholarship to of immediately entering the using his baseball scholarship to college, and will then make his decision about signing with the kansas City Royals next year in

Lane's father, Gary Crews, explained that basically Kansas City has drafted Lane. He is now actually property of the Kansas City Royals for one year because they have drafted him, but Lane describ have to actually in with doesn't have to actually sign with them at this point.

During Glades Day School Baseball Coach Mike

Baseball Coach Mike Underwood's coaching career

Underwood's coaching career Lane Crews pitched the first perfect game, vs. Lake Worth.
"He struck out 14 of 15 batters, that came to bat. Only one man made contact," Underwood said. Crews had a great senior seasor. "Lane knew the pressure was on for a scholarship and he handled the pressure well. He pitched for us until the jast out," said Underwood.
"I felt Lune could nitch college."

Underwood.

"I felt Lune could pitch college ball. I thought if he did well his senior year and produced, he would have a shot at pitching major league baseball,".

Underwood added.

Underwood added.

"Lane's not going to sign with
Kansas City at the present time
because of the way they offer
their deal and because he has a
baseball scholarship to PBCC and
that is where he will be attend-

ing," said Mr. Crews.

No one out of high school goes

to one out of night school goes straight into the major league, they have different levels of minor league programs before making it to the major league. Kansas City can make Lane an offer at any time during the year, but basically they would wait until this year's baseball season is over at PBCC to see if Lane has progressed to another level of

By the rules of the major league Kansas City has option on Lane for one year, prior to the draft in June of next year. If Lane has progressed this coming season at PBCC and they are satisfied with what they are seeing at that time, Kansas City has the first right to offer him a contract to sign, or they could release him and let him go back into the draft but either way Kansas City has the first option to his contract for one year.

The scouts will be watching Lane during his college period to

one year.

"The scouts will be watching Lane during his college period to see if he will progress to a higher level of play and can still produce; at a higher level of competition; explained Mr. Crews.

Kansas City. Scout Albert Gonzalez advised Lane to go ahead and play college baseball for one year at least, this way be would gain another level of play. Anne will start classes at PBCC in August. Baseball starts approximately two weeks after school starts.

"Lane always said he wanted to play major league baseball and always joked 'around with him by slying OK son. Now he actually has a shot," Mr. Crews said proudly.

ly has a shot," Mr. Crews said proudly.

"Tve always wanted to play asseball but my parents, Coach Underwood and Dick Smidt, GDS Athletic Director are the ones, responsible for making this hap-pen," said Lane.

CIRCUIT THE WINSTON CUP

THE WINSTON CUP SERIES COMING UP: Pocono 500 WHERE: Pocono Raceway, Lo way, Long Pond,

WHEN: Sunday, June 21 DEFENDING CHAMPION: Jeff Gordon EVENT QUALIFYING RECORD: Jeff Gordon, Chevrolet, 198.725 mph, June 14, 1996.
RACE RECORD: Alan Kulwickl, Ford, 144.023 mph, June 14, 1992.
OTHER FORMER WINNERS: Darrell Waltrip and Bill Elitoth have each won four races at Pocono. Geoff Bodine is a three-time winner. WHEN: Sunday

********** ALMOST HOME COOKING

The Poconos are full of coy little-diners that serve-food that will stick to your ribs. The chill is unlike the kind served in Texas, but it is, just as filling and easier on your innards. In many diners, the chill is served inside a makeshift bow made of homemade bread. The Poconos are a great area for mashed potatoes, meat loaf and gravy. The hills are filled with quality "meat and three vegetables" joints.

NOTABLE: Pocono has been hosting Winston Cup events since 1974. ... Richard Petty won the first race, ... Ken Schrader has started on the pole

here five times.

CRAFTSMAN TRUCK SERIES
COMING UP: Loadhandler 200
WHERE: Bristol (Tenn.) Motor Speedway
WHEN: Saturday, June 20
DEFENDING CHAMPION: Ron

Hornaday
TRACK QUALIFYING RECORD: Ron
Hornaday, Chevrolet, 119.910 mph,

TRACK QUALIFVING RECORD: Ron-Hornaday, Chevrolet, 119.910 mph, June 20, 1997.

RACE RECORD: Rick Carelli, Chevrolet, 83.992 mph, June 23, 1996.

OTHER FORMER WINNERS: Joe Ruttman and Carelli won the first truck events at Bristol. Ruttman's was the first Ford victory in the history of the series. NOTABLE: Carelli has finished in the top five in each of the last two events with a win and a fourth. ...Jay Satter has finished third two years in a row.

PROFILE

Sterling Marlin

from my former team's restrictor-plate motor program. It was a very good program. But there's a lot that goes into a race team, and there are a lot of races at a lot of different tracks. I'd be lying if I said I didn't have a special liking for those tracks because that's where I've enjoyed some of

where I've enjoyed some of the greatest moments of my career. But what I don't

career. But what I don't think people realize is that Team Sabco's motor program is right there with the 4 car's numbers (his former team). They're working awfully hard on them, and it looks like they've found a lot of horsepower in the last few months."

CAREER RECORD: 416 TOR-PLATE TRACKS? By Monte Dutton
NASCAR This Week
This two-time Daytona
500 champion is driving for
a new team. Sterling Marlin
joined forces with car owner
Felix Sabates during the
off-season, hoping to lead
the resurrection of Team
Sabco's three-car Chevrolet
effort. "Some people might say that my success was only from my former team's starts, nine poles, six wins, 56 top 5s, 142 top 10s, almost

starts, nine poles, six wins, 56 top 5s, 142 top 10s, almost \$11 million in winnings. FIRSTS (WINSTON CUP): Start (May 8, 1976, at Nashville), pole (July 4, 1991, at Daytona), win (Feb. 20, 1994, at Daytona).

WHAT WILL IT TAKE TO GET TEAM SABCO BACK INTO VICTORY LANE?

"I know we can do it, plain and simple. If we can win two or three races and finish in the top 10 in points, it will be a successful-season. I've been really impressed with this team, and I think it's going to provide me with a great opportunity to get back up there in the points."

WHY DO YOU THINK YOU HAVE BEEN SO SUCCESSFUL ON RESTRIC-

Tery Labonte's latest paint job is predomi-nantly red, mainly to sell boxes of "Marshmallow Blasted Fruit Loops." Amazingly, they're not half bad, and the boxes are vividly designed to promote NASCAR racing.

RACING ON THE WEB ske Corp.

Dear NASCAR This Week,
I have been a die-hard Dale
Earnhardt fan for the past several years. I feel the reason for
his lack of success this year,
outside of winning the Daytona
500, is the lack of focus on his
driving. He is too busy concenting on Dale Jr's career, his
truck and Steve Park's car, to be
totally focused on his driving
like he should be, Also, he
needs a crew chief who is
totally focused on his car and
out off doing commentary for

VEURTURN

Dear NASCAR This Week

totally focused on his car and not off doing commentary for other races when the Cup is not running. Now that he is driving with injuries, he won't have a chance to heal and will do nothing the rest of the year. The reason Jeff Gordon is successful is that he has no other interests other than driving his DuPont Chevrolet. He is totally focused. Also, Ray Evernham is totally focused on Jeff's car, so he and Jeff are working together all the time to get the car set up correctly for each race.

each race.

Darrell Waltrip has proven in the past several weeks that he can still drive a car. By selling his race team, he can focus entirely on his driving and become successful again. If. Dale wants to be a successful driver, maybe he should give up his other interests or quit driving and focus on being a car owner. Most people can't be successful at both.

Kathy Legner

Intelligent **Transportation** Systems Help **Reduce Road Rage**

(NAPS)—A study for the AAA Foundation for Traffic Safety found that aggressive driving in the United States leads to the deaths or injuries of at least 1,500 men, women and children each year. But advanced transportation tech advanced transportation ecci-nologies can help ease conges-tion and lower driver stress, thereby increasing the safety factor, according to the Intelligent Transportation of America (ITS

merica).
For example, San Antonio, For example, San Antonio, Texas, is using computerized lane markers positioned above the roadway to indicate which lanes drivers should use to navigate through tie-ups ahead most easily. A green arrow indicates the lane ahead is clear. A red "X", alerts motorists to move out of that lane.

lane.

In Santa Monica, Calif., a
"Smart Corridor" of arterials
parallel to the freeway shares
traffic as needed with the
express route. When an accident occurs on the freeway,
traffic engineers can change traffic engineers can change message signs and display real-time information that advises drivers to use the par-allel local roads. Once the traf-fic shifts to the alternate routes, the officials can create a "green wave" of traffic sig-nals that compensates for the

xtra volume. Meanwhile, Maryland is responding to accidents faster by using roving tow trucks and lane sensors that measure con-gestion on I-95, the primary route along the East Coast. State officials report the pro-gram decreases delays associ-ated with accidents by two-million vehicle-hours a year.

"The safety benefits of intel-ligent transportation systems are real," says ITS America President and CEO John Collins. "Intelligent trans-portation systems give travel-ers the right information so Collins. they can make better and safer they can make octure any sater choices, whether they are commuting to or from work or going across country."

As an accident ahead begins

to delay traffic, cars begin to zip in and out of lanes, tailgate each other or race up the shoulder. Frustrations build. "An uninformed driver is an unhappy driver and, potentially, a dangerous driver," Collins

But by providing real-tim information to travelers and reacting quickly to accidents and other tie-ups and other tie-ups, transporta-tion officials can ease traffic flow and driver frustration, Collins points out. So in the Seattle area, officials are pro-Seattle area, officials are pro-viding more than 100,000 daily viding more than 100,000 daily Internet visitors with real-time information about road conditions and transit sched-ules. Similar programs using state-of-the-art technologies to ease travel worries are under way in the Phoenix, New York. and San Antonio metropolitan areas, and elsewhere around

ITS America is an educational and scientific public-private partnership of 1,300 member partnersmp of 1,300 member organizations promoting the use of advanced technologies in surface transportation. For additional information on intelligent transportation sys-tems, contact: ITS America, Suite 800, 400 Virginia Ave. SW, Washington, DC 20024-2730, call (202) 484-4581, or visit the ITS America Web site at http://www.itsa.org.

See The Light With Virtual Cars

computers are helping us understand virtually every-thing in our lives—from thing in our lives—from what we read to what we buy to what we drive. That's especially true as

scientists and researchers continue to find out why

continue to find out why things work.

Take, for example, auto-mobiles. Technology can now let auto companies see virtual prototypes of auto-motive parts and assem-blies before actually build-ing the vehicles.

This may help save time

ing the vehicles.

This may help save time that would otherwise be spent putting cars and trucks together, then revising them and taking them

Maybe one day, con-sumers can "test drive" new automobiles being devel-oped by sitting in front of a

screen.

One manufacturer using virtual reality is General Motors. The company's VisualEyes is an advanced 3-D visualization system that helps automotive designers and engineers evaluate models of products without building the physical protections. cal prototypes.

VisualEyes provides a

realistic, full-size vehicle that reviewers can interact with in a surround-screen display. The system uses the "CAVE™" approach originated by the University of Illinois at Chicago—a virtual reality room in which participants can be totally immersed in a computer-generated vehi-cle. Participants can sit inside a vehicle made only of light. The only thing real is the seat. General Motors uses VisualEyes to evaluate full-size vehicle exteriors and interiors.

The system can also help

by letting automotive experts observe a simulated crash test, and make need-ed revisions in the vehicle's

de revisions in the vehicles makeup if necessary
"Virtual reality technology enhances the design and evaluation process by giving engineers and customers the chance to 'see' and experience the product almost immediately," said Randy Smith; a researcher with General Motors.

cles, you may visit the com-pany's Web site at www. gm.com.

The New Dodge

1998 Dodge Durango

Ever since the demise of the full-size Ever since the demise of the full-size Ramcharger truck several years ago, Dodge hasn't had a player in the all-important sport/utility segment. That has been corrected for 1998 with the introduction of Dodge Durango, an all-new compact sport/utility based on the marque's popular Dakota pickupi Durango is actually a little bigger-intentionally—than the other compacts in the class, but not as big-intentionally—as aya, a Ford Expedition. Dodge has created its own SUV niche.

The new Durango features a sleek, aero-dynamic design that can carry as many as eight people. The roof above the rear two rows of seats has been raised 2 in. to give those occupants more headroom. With the seats folded down, Durango boasts a best-in-class cargo capacity of 88 cu. ft. Positioned in the middle of the sport/util-ity market, Durango has been designed to appeal to buyers who want to balance peo-ple-carrying ability and cargo-hauling util-ity. Durango is expected to compete with

Ford Explorer, GMC Jimmy, Chevrolet Blazer, Jeep Grand Cherokee, Mercury Mountaineer and Toyota 4Runner. For now, Durango comes as only a 4-door with 4wd. A 2wd version should be available in 1999. The base engine is a 3.9-liter V6: Optional are 5.2- and 5.9-liter V8e. All Durangos come with a 4-speed automatic transmission. There are part-time and full-time 4wd systems, as on Dodge's Jeep cousins. Both can be shifted to 2wd for fuel economy. PRICE: \$27,100-\$33,500

Major styling changes for mid-size sedans

The mid-size sedan is the lat-est love of the American public.

What may be one of the first major styling trends for the most popular type of car in American - the mid-size sedan - was seen for the first time by visitors to auto shows nationwide recently.

Concerned about practicality, mid-size sedan buyers have always sought out relatively conserva-tive styling, However, industry analysts note, those buyers are beginning to show interest in vehicles with more personality.

Picking up on this trend, Hyundai Motor America introduced Hyundai Avatar, a show care which explores midsize sedan styling trends The vehicle stands out because of the strong character lines over the front and rear wheel openings. These character lines, while more subdued than in the Hyundai Tiburon, give the car a family resemblance to its

sportier sibling.

Design elements such as character lines, which give the Avatar a more aggressive appearance than the typical sedan of today, will be a trend that will be more popular in the future.

The Avatar also boasts a dramatic, frontal look. with large headlights pushed to the corners of the vehicle, which emphasize the car's size and presence. The bright, bold vertical bar grille highlights the front of the car, with the lines of the hood flowing smoothly into the bumper, while focusing the eye on the dominating grille. The car is slightly larger in both interior and exterior dimensions than Hyundai's current midsize sedan, the Sonata.

At the rear of the Avatar, a high trunk lid serves as a visual cue to the spacious trunk underneath. The rise up at the back end of the trunk provides the look of a rear spoiler, in keeping with the overall sporty sedan tone of the vehicle. Large rear tail lights offer a safety benefit and echo the strong placement of the headlights in the

t may take a lot time and eff emove bugs, tree sap and esidue from your windshield

(NAPS)-Splat! Warmer weather is here and that means...Squish!...the bugs are out. They can make a mess of your windshield and obstruct your view of the road ahead. Residue from birds and trees can be equal-ly troublesome for motorists during the spring and sum-mer months. Whether you're

Getting Out Of A Sticky Situation

strictly a highway driver or someone who likes to head for the fields and forests, your windshield is sure to attract some of the most sticky, unpleasant and hard-to-remove residue during the spring and summer months.

According to Jim Brown,

Car Care Product Manager for Prestone Products Corporation, "The longer substances like bug protein and tree sap are left to hard-en on windshields, the more difficult it becomes to remove them. Bake them in the summer sun, and you're in for some heavy scrubshield clear of the sticky stuff, use a special wind-shield washer formula designed to remove unwantdesigned to remove unwant-ed summer residue, such as Prestone® BugWash™ windshield washer fluid. BugWash has a specialized formula containing concen-trated cleaners ideal for removing bugs, road grime, tree sap, and other hard-toremove substances.

However, bugs and birds hit more than your windshield. And chances are, you won't want to hop out of your car or truck every 20 miles or so to remove each squashed insect from your side mirrors, front grille and

headlights. When you get home to deal with them, you may need a little extra musheadlights. cle to get rid of the dried-on substances. There are a number of products available that have been developed for just that purpose. One of these is Prestone® Professional Clean Bug & Tar Remover which comes with a convenient scrubbing pad attachment right on th can, making removal quick and easy.

So when things start to heat up and mother nature begins her onslaught, be ready to fight back by being

How To Keep Cool This Summer

(NAPS)-Surprise, alarm. frustration and anger...this summer, many motorists will be getting all hot under the collar again due to an engine boilover. Cooling system failure

is the #1 cause of engine-relat-ed breakdowns. According to Dr. Dale McKenzie, Vice President of Research and Development at Prestone Products Corporation, the hot weather puts a real strain on your car's cooling system, making it harder to keep your engine's temperature stable. engine's temperature stable.
Also, the simple act of turning on your air conditioner may keep you cool but it's like an oven heating up next to your engine. "Excess heat increases engine. "Exception of the risk of the risk of boilovers," says McKenzie, "it can actually cook your rubber hoses and belts, shortening their life. It takes a high quality antifreeze/coolant to stand up to these everperformance increasing demands."

The three best ways to help your car keep its cool are: 1) Keeping your cooling system clean, 2) changing your antifreeze/ coolant regularly, and 3) maintaining your antifreeze/coolant at a 50 per-cent concentration. Here's how to make the annual antifreeze flush and fill safe and uncomplicated. Before changing your antifreeze, check your owner's manual for any special instruc-

1. Drain the used antifreeze/ coolant into a buck-

et large enough to catch the flow. Never allow the used antifreeze to drain into the ground or storm drains. Close the drain valve.

Flush the radiator system before refilling with new antifreeze/coolant. Experts recommend using a cooling system flush like Prestone® Super Flush to get out the rust, grease and sediment that plain water cannot. To do this, remove the radiator cap and fill the radiator with clean water and the flush/cleaner. Run the engine for ten minutes after reaching normal operating emperature with the heater on high. Stop the engine and allow it to cool. Drain the radiator again, close the drain valve and refill with water alone. Run the engine for ten minutes after reaching normal operating temperature, redrain the engine and close the drain valve.

Refill the radiator. Check your owner's manual for cooling system capacity and any special service instruc-tions. Install enough Prestone antifreeze/coolant to achieve a 50 percent-70 percent concentration, then top off with water. the engine at normal operating

high for ten minutes after the high for ten minutes arrer use thermostat opens. Shut off engine and allow to cool. Top off system and coolant reservoir.

4. Dispose of the used

antifreeze/coolant in accordance with any federal, state or local laws.

local laws.
5. Check coolant concentration. You can use special Prestone® Test Strips. The strips work for both ethylene and propylene glycol-based antifreeze/coolant and change color according to the concentration of coolant in the sys

tem.
6. Check for any spills or leaks and clean up immediate-ly. Tighten the child resistant cap on the anti-freeze/coolant and store securely away.

To further protect your cooling system against rust and corrosion, you might try a product such as Prestone® Super Anti-Rust which has been formulated to protect aluminum and other metal parts while also helping to protect vital water pump seals. And, if you are concerned that your cooling are concerned that your cooling system has already developed leaks, use a product such as Prestone® Super Sealer, which will quickly seal many of the holes and cracks that develop in cooling system parts.

The Intruder Is Dust

(NAPS)-The next time you're driving on unpaved road consider this: If the surface is irregular, it's rough on your car's sus-pension and tires. If dust is

being raised, it could get into your car's engine and cut down on your visibility. These are some of the rea-sons why many townships are using a dust control

agent that can keep the dust down longer, actually improves the road surface when it's used and doesn't have to be re-applied that often. It's a clear, odorless liquid dust control agent liquid dust control agent containing calcium chloride that can be sprayed on unpaved roads. The result is less dust in the air, better driver visibility and reduced rutting and washboarding.

Users of LIQUIDOW® liq-uid calcium chloride, for example, report that this method not only reduces dust and improves driver safety, it also reduces lost aggregate by up to 75 to 80 percent. This translates into substantial savings in unpaved road maintenance

That's why many residents are urging their township officials to use liquid calcium chloride to control excessive dust on unpaved roads

1998 Subaru Legacy Outback Limited

SUBARU/From 1

slightly peppier performance. Fuel economy with the 5speed is exceptional. We got of city and highway driving. However, with the automatic mileage drops below 20 to 19.1though that was with mostly city driving. This is considerably better than midsized 4WD sport utility vehicles, which usually net around 14.15 mpg under similar circumstances. The suspension strikes a fine

under similar circumstances.

The suspension strikes a fine balance between ride and handling-and both are better than virtually any SUV and on par with cars in the same class. Subaru's AWD system not only provides terrific grip in wet or snowy conditions, it works unobtrusively. You never have to worry whether it will be engaged when you need it.

Road noise is lower on the Outback Limited than of the Utback Limited than often the Legacy models, and about equal to that of a typical compact sedan. The anti-lock

pact sedan. The anti-lock brakes on our test car felt strong and had good pedal modulation.

Accommodations Outback's raised roof provides plenty of head room front and rear, and

there's adequate leg room for four adults. It also enhances the wagon's cargo space, which is already generous and bene-fits from a fold-down rear seat-back. Sedan models have a modest trunk

modest trunk.

All Legacy models have plenty of interior storage. There are large door map pockets, a small covered bin between the front seats, a small glovebox, and two cupholders that pop out of the dashboard

The gauges are large and legible. Climate controls are clearly marked and easy to reach, but the stereo is mounted too but the stereo is mounted too low to adjust without looking away from the road. The power window and lock controls are mounted at an awkward angle on the driver's door, and they aren't lit at night. Visibility is excellent to all directions thanks to thin roof pillars and a high seating posi-tion. All doors open wide, and the Outback's raised suspen-sion is no hindrance to entry or

sion is no hindrance to entry or exit. The rear doors are narrow at the bottom, making it diffi-cult to swing your feet in or

BUILD QUALITY

above the average for this class, and there were no ciass, and there were no squeaks or rattles. Our test car's paint was smooth and lus-trous.

VALUE FOR THE MONEY

Though it lacks the towing power of a full-fledged SUV, look at the Outback if you desire 4-wheel drive and don't need a truck-based vehicle. It can crawl through snow and over fairly rough terrain while providing all the comfort and driving ease of a passenger car. Compared to an SUV, it costs less to buy and gets better fuel

Today's "New Driving Reality" Requires Advanced Brakes

Safety Advancement (NAPS)-We have become (NAPS)—We have become a nation of motorists who are commuting further, speeding faster, and idling longer in stop-and-go traffic on our congested highways.

"With this new driving reality, what becomes criti-cally important is our ability to stop shorter and this requires high quality brakes," according to requires high quality brakes," according to Marshall Doney, vice president of Automotive Services for AAA. The braking system is the most important system for the safety of the driver and passengers." Fortunatelly, there's good news for consumers because now they can purchase replacement brake pads that have undergone rigorous and

have undergone rigorous and objective testing known as "D3EA^{TM"} (Dual Dyna-"D3EATM" (Dual Dyna-mometer Differential Effec-tiveness Analysis). Up until now, automotive technicians had no way of knowing whether a replacement brake pad was consistent with per-formance standards estab-

Sale Good From

lished for a specific vehicle.
And, because no federal safety standards exist for
replacement brake parts,
most vehicles today with
replacement brake parts are
not performing at the level to

which they were designed.

That's why D3EATM technology represents a major breakthrough in laboratory evaluation of brake friction

materials.

D3EA™ certifies consistency with Original Equipment Federal Motor Vehicle Safety Standards for new vehicle brake systems. Brake pads that have been D3EATM certi-

that have been DSEATM certified an stop a car at least 20 feet shorter than non-certified brands from a speed of 45 miles per hour.

According to Steve Handschuh, president of NAPA (National Automotive Parts Association), "D3EATM is the answer for settling a high industry standard and it is the only test that deteris the only test that determines if a brake pad will effectively stop a vehicle in the way it was designed to stop. D3EA^{IM} certified products provide the long overdue 'seal of approval' that con-sumers can rely upon as an objective measurement of

quality, safety and performance for brake pads."

This advanced technology and machinery was devel-oped by Detroit-based

This advanced technology and machinery was developed by Detroit-based Greening Testing Laboratories, Inc., an independent party not affiliated with a friction product manufacturer. The D28AM certified program is a voluntary process and only a select few companies like NAPA offer a premium brake line—NAPA United Application—Engineered—that is D3EAM certified. What most consumers don't know is that when they brake, it requires a force ten times as powerful as the force that moves the car to stop it. So if you hear your car squeaking for grinding when you depress the brake, your braking system needs attention. Or, if the pedal "fades," feels spong or falls under steady foot pressure, it's time to take your vehicle in for service.

New Towing Service Gives Drivers A Lift

(NAPS)-The launching of a (NAPS)—The launening or an new nationwide emergency roadside towing service is giv-ing drivers a lift across the United States. Unlike other, services which require mem-bership fees, the new service, 1-800-TOW-TRUCK, is said to enable drivers to gain immediate access to roadside assistance without the need for operator intervention

tance without the heed for operator intervention:

How It Works
When drivers are stuck on the road, regardless of location, 1.800 - TO W - TR UT C K's advanced digital computer technology routes the call directly to the closest participating service station. There are no long waits on hold, no operator intervention, no waiting endlessly for a tow or jump. The service station closest to the driver, who needs help immediately sends out assistance. So far, thousands of service stations nationwide have joined the new towing service network.

1-800-TOW-TRUCK ides drivers with 24-hour toll-free dispatch, 365 days a year. According to the company's owners, floward Jonas and Josh Weiss, help will be on the way (usually within 30 min-utes) to resolve the problem and/or tow the driver to the closest 1-800-TOW TRUCK facility, which can make necessary to the contraction of the

facility, which can make neces-sary repairs to get the driver, back on, the road again.
According to the 23-year-old Mr. Weiss, four out of five insurance companies and auto clubs will previde reimburse-ment for these services.
The new service also provides:
Locksmit services
Flat tire repairs
Jump starts

- Jump starts

With over 130 million cars on with over 130 million cars on the road today, the premium service, which has no member-ship fee, is expected to help steer many drivers away from roadside trouble.

SAFETY TIPS FOR TOWING

Architectus Quadous Neind Features

Trailering can be à safe, enjoyable
experience iff you have the right
equipment and the and maintain if properly.
One of the world's leading authorities on towing and trailering. Draw-Tite,
offers the following safe towing tipe.

1. Check the hitch ball, coupler, safety chains, retraining priss and clips and all,
other connections EVERY TIME YOU
TOW.

2. Don't proceed until you're sure rerything is secure and that the trailer

other important towing safety products, talk with your Draw-Tite dealer, Look in the Yellow Pages under Trailer Hitches, the Yellow Pages under Trailer or write Draw-Tite, P.O. Bo Wayne, MI 48184.

Getting Vehicles To Go The Extra Mile

(NAPS)-Your beloved minily vacations, soccer team trips and gardening projects, is showing its age. Power has dropped off, it's making some unseemly noises and, most ominous of all, there's white smoke coming from the tail

Time for minivan heaven, right?

Not so fast. Before jumping into the market for a new vehicle, consider all of your options.

Just as a homeowner wouldn't abandon his or her home when it's time for some rewiring, people no longer automatically assume that their minivan, light truck, sport utility vehicle or passenger car is beyond hope when the engine begins to show its

dition of the typical vehicle infrastructure-body panels, wiring system, transmission, etc.-might have dictated buy-

Today, however, with dramatic increases in engineering and manufacturing quality, vehicles have become infinitely more durable

In particular, body panels are nger rusting out in four, five or six years. Electrical hares, transmissions and the other automotive life-support systems are equally adva Even that beleaguered engine probably has tens of thousands

ork, of course.

A new vehicle may carry a \$25,000 price tag. Even the most attractive vehicle leasing packages carry hefty price tags. Once you factor in the down payment and surrender charge, not to mention the mileage sur charge, you've basically bought yourself a car—except you don't own it at the end of the term.

w much will engine repair cost? It depends on the extent of damage to the engine. Chances are very good, though, that you'll be limited to remanufacturing a cylinder head.

Even a cracked aluminum can be made like new these days, and with all new internal components-valves, spring the cost of repair shouldn't exceed \$1,500.

Even in the worst-case sce nario-a complete engine overhaul or the outright purchase of a remanufactured motoryour out-the-door cost shouldn't exceed the down payment (through lease or purchase) on that new vehicle.

Most quality engine rebuilders offer extended product warranties. You should expect to save thousands of dollars over the next few years simply by rebuilding your pre-

What is rebuilding? The lo of horsepower or presence of tailpipe smoke is likely the result of the gradual wearing of . ing tolerances designed by the

This can cause excess oil con sumption and the telltale blue

smoke, the loss of compression and power during the combustion process (explaining your engine's lack of torque), and a variety of other telling symp

"Rebuilding an engine is process through which a skilled technician, using precision equipment, remachines your cylinder head and/or block to new specifications, installs brand-new internal components," explains Ray Swetman, engine parts mar-keting manager for Federal-Mogul Corporation. The result is a return to the exact operatengine is, in many respects,
